FORENSIC AND E-DISCOVERY SERVICES

With a superstar lineup of IT professionals, ex-FBI, former military and police personnel, you can trust that our forensic team has the skill set and background to conquer even the most complex collection.

Fortz Legal understands that every case is unique, therefore we work with you to understand the issues at hand and create a custom discovery protocol. Our experts have written many ESI protocols that have been adopted by several federal courts across the country. We have testified and been appointed as “special master” on several occasions, and the best part is, our “experts” actually speak in “plain english.”
