

# Your Vision. Our Expertise.

We specialize in full-service trial preparation and presentation.

**NO JOB IS TOO BIG OR TOO SMALL, WE DO IT ALL!**

Prior to trial, our consultants can help in all facets of trial preparation. This includes building the trial database, developing the PowerPoint presentation to be used during Opening Statement, graphic design of demonstratives and timelines, preparing impeachment clips, and video clips of witnesses who are testifying via their video deposition.

# LET'S GET TO WORK!

During the course of trial, our consultants will manage the loading and coding of information/data in the Trial Presentation Database. This includes all documents, exhibits, video, audio, animations, native files (i.e. Excel Spreadsheets, PowerPoint Presentations, Animations), deposition transcripts and any other demonstratives you need to effectively present your case. Our consultant will design the courtroom with high-tech audio/visual equipment and they will be able to troubleshoot and support all equipment in the event of any problems that may arise.

While in trial, our consultants will run, support and present all demonstratives electronically. This includes, but is not limited to:

- Instantly pull up exhibits and annotate, highlight and zoom in on them in real time while the advocate is speaking soliciting testimony about that exhibit.
- Strategize with trial advocate on how to most effectively present the evidence throughout the course of trial.
- Practice and prepare witnesses and experts prior to testimony.
- Create side-by-side comparison of documents, calling out sections of each page simultaneously when needed.
- Create custom animations/demonstratives to simplify complex concepts.
- Play audio and/or video testimony synchronized with the deposition text transcript while displaying relevant documents, images, timelines or animations.
- Create deposition clips, even in court, to impeach inconsistent witness testimony.
- Create custom opening and closing presentations with the use of PowerPoint to:
  - Introduce the jury to your cast of characters.
  - Display your exhibits and key documents when applicable.
  - Create demonstrative slides to help explain complex themes, concepts, and terminology.
  - Create timeline while displaying key documents for each event.
